

08:15 – 08:45 Registration and breakfast

08:45 – 08:50 Welcome and introduction to the event

Niall Rowan - ASFP COO

08:50 – 09:10 The vital role of Passive Fire Protection

Niall Rowan - ASFP COO

What is passive fire protection and how does it work? What are your legal responsibilities?

09:10 - 09:35 Construction of Edinburgh Schools Inquiry – where do we go from here?

Sharon Lobban - AVESTA

The **Report of the Independent Inquiry into the Construction of Edinburgh Schools** highlighted failures in the quality of construction and fire-stopping installation in a number of Edinburgh schools. This presentation reviews the report and considers ways to raise awareness throughout the construction process to improve the design, installation & maintenance of passive fire protection.

09:35 - 10:20 Understanding Passive Fire Protection

Niall Rowan - ASFP COO

An overview of the main types of passive fire protection systems and what to consider when specifying, installing or inspecting such systems including:

- * Structural fire protection
- * The role of fire doors and their associated hardware
- * Fire resisting glass
- * Fire curtains
- * Fire resisting ducts and damper
- * Fire-stopping

Presentations will include video footage on the *Correct Specification & Installation of Fire-Stopping; Fire Doors & Fire Resistant Glazing*

10:20 – 10:30 Questions

10:30 - 10:55 The importance of correct installation, inspection & maintenance

Jeff Brydon - IFC Group

What can go wrong, what to look for and the benefits of specifying third party certification of products & installers

10:55 - 11:15 How can the ASFP help?

Tony Corcoran - ASFP Membership Officer

A review of the free technical publications, guidance, videos and membership & training services available from the ASFP

11:15 – 11:30 Questions

11:30 Depart
